A minimalist puzzle game. It's about turning a mirror to collect the orb. To be successful, you have to make sure that the orb is visible and don't let it get out of the mirror. To get the orb, you have to turn the mirror more than once and collect the orb. The game will increase the level for next time when it's still possible to get the orb. The background music will also change. And now if you scored a high and any level is still bugged. Send me a email. There was an error signing you up. There was an error signing you up. What's new:

Ruthless Conquest: The Battle of Hormozd 462-425 BC is an historical novel by the Persian-born English author Houghton Mifflin Harcourt. It tells the tale of Xerxes I of Persia's great military expedition against Athens between 486 and 479 BC. It was first published in 1999 by Houghton Mifflin Harcourt and has since been translated into several languages. Plot summary In 499 BC, Mardonius was acting as a political adviser to Artaxerxes II of Persia, the grandson of Darius I, when the latter told him to pass on a message to Athens; "If you find wealth to your liking, seize it. If you have need of power, we will supply it". The Persian emperor was in agreement that, given the past successful campaigns they had launched together against the Greeks, Athens was ideally placed for conquest. Mardonius was also born in Persia, and being the long-serving commander of the Greek-speaking elite Immortals, he was well suited to seeing to the logistics of an expedition in which the largest army Artaxerxes had ever commanded was to be operated. Athens was determined to repulse the forces of Xerxes' father Darius, who had just died, but the Athenian military soon became caught in the gears of events. While Mardonius travelled safely back to Persia with Artaxerxes, after seizing the Greek city of Olynthus in 497 BC, the Athenians would find themselves unable to undertake any major decision regarding the forthcoming war because of the unexpected death of Themistocles, whose presence was still required at home. Themistocles' wife, however, was Cleisthenes' sister; and she proved even better able to influence on Themistocles' behalf than he was on his own. The trials of the Spartans at Thermopylae were made so much more difficult, in 500 BC, by their internal disputes over the unpopularity of Leonidas and by issues of land ownership, despite their Royal connections being far superior to those of their Spartan neighbours. The debate in Athens over the issue of re-submission to Persian rule started to go in favour of the Athenians as they became convinced that a Spartan-

Persian coalition would soon be forthcoming. The same Athenians also, moreover, distrusted Pericles' motives for accepting the command. Xerxes then launched a massive invasion of Greece, capturing the
