What is the difference between a Photoshop tutorial and a Photoshop for Dummies tutorial? A Photoshop tutorial is specific and geared toward teaching you how to use Photoshop's numerous features. Photoshop for Dummies tutorials are more like reference books and are intended to help you start using the various features. The following sections contain a list of online Photoshop tutorials available for free and commercial ones that are available for purchase. Hosting tutorials online It doesn't get any easier than watching someone else show you how to accomplish a task. You get the benefit of having the expert's full attention while you learn. Many people around the world with high-speed Internet access can access the Internet and view the tutorial. You have no limit in terms of the number of people who can view the tutorial at one time. Most tutorials are live broadcasts with a video link provided where the viewer can pause the video, take notes, and ask questions. When you purchase a tutorial from a vendor, you're not usually given video permission to distribute it to others — unless you're buying a course from a major publisher — because of the online publishing industry's stance on piracy. The educational content of a tutorial, however, is pretty much public domain. The main rules of the online tutorial market are no pirating and staying within the limits of your Internet plan. You can always find free tutorials by searching for keywords such as 'desktop publishing, Photoshop, web design, tutorial,' or even 'digital photography;' here's a sampling of results from a Google search: 'desktop publishing:' ` ` ` ` ` ` `
