More information about available APIs can be found in the API Documentation, or by exploring the many listed in the External Plugins category at the Autodesk Application Center. A few objects within AutoCAD such as blocks, drawings, DWG drawings, and layers can be bound to external data. These objects have export functions for automatic export to external formats such as CSV and XML. A concept called "plug-ins" in AutoCAD can be similar to other applications' add-ons (for example, visual add-ons in other Adobe applications). However, AutoCAD plug-ins are actually a class of objects in AutoCAD that can interact with the user, as well as other AutoCAD objects, using a method of calling each other similar to methods. AutoCAD is extensible, such that it can be customized to fit a specific user's needs. Adding new capabilities to the product is an inexpensive way to meet the needs of a specific user community. AutoCAD Architecture is a product that extends the capabilities of AutoCAD by offering design analysis, quality assurance, scheduling, and cost management. AutoCAD Architecture is designed to help the architect in the design phase. It assists in the design process with a set of specialized design tools to help the architect generate and analyze results from a variety of design tasks such as conceptualization, analysis, validation, design review, and documentation. The architectural design tools are based on modeling environments and design tools such as the CAD analysis tools. AutoCAD Architecture is a desktop application that runs on Windows, macOS, and Linux operating systems. AutoCAD Architecture and the various design tools are available for download from Autodesk Exchange Apps. See also List of CAD software References External links Architecture Category:CAD software

Our partners have informed us that their foodbanks are already stretched to breaking point at the moment and we are asking people to support us by donating via our JustGiving page. Thank you to everyone who has donated so far. Your generous support means that we can support our partners in a much bigger way than just providing the food we already donate every month.
