As of CAD 2013, Autodesk introduced a new object-oriented programming language AutoLISP to the Autodesk Application Framework, and AutoLISP is used in AutoCAD and AutoCAD LT to control commands. AutoLISP is an alternative to Visual LISP. The following APIs are accessible from native applications, as well as from scripting languages such as AutoLISP and Visual LISP and VBA. The shortcut should be displayed in the software. ``` Autodesk Autocad [version] (...) [Full Version] (...) /RegKey [HKEY_CURRENT_USER\Software\Autodesk\Autocad\Autocad.exe] ``` ## Autocad Key generator Once the installed version is registered, the user is prompted to install the Autocad Keygen, an executable that will allow the activation of the software (in the user's computer), avoiding the installation of the full version of the software and avoiding the number of prompts. The execution of this executable opens a window that asks the user to insert the license file you want to activate your software. In this case, you can find the necessary license file in the file path `HKEY_CURRENT_USER\Software\Autodesk\Autocad\Autocad.exe\KEYFILE` ## How to use the Autocad Key Once the Autocad Key is installed on your computer, you can enter the following line of code to activate Autocad, with one of the optional parameters (-f or --full), that will allow you to have a full version of the software (as shown in the image below) instead of the developer's version: ``` autocad.exe -c FILE_PATH -f ``` **Example:** ``` autocad.exe -c C:\Users\AEMARCO\Desktop\CAD.pbp -f ``` ## A few recommendations After activating the software, be sure to delete the configuration folder `.ACAD` and `.ACAD-PRO` from the following folder: ``` C:\Users\username\AppData\Local\Autodesk\Autocad\15.1 ``` To ensure that Autocad is always the only version of the software that appears in your computer, create a new registry key: ``` HKEY_LOCAL_MACHINE\Software\Autodesk\Autocad\VERSION ``` ``` Autocad.exe [filename] ``` In this way, the software won't ask you to install the full version every

AutoCAD finds and corrects most common typos and formatting errors with a single click. (video: 1:07 min.) Collaborate: Share work with others, including teammates, co-workers, and customers.
