When the thread starts, the console output becomes very ugly. My problem is that the thread stops responding after only 5-10 seconds of execution and it keeps getting worse. After it's finished, it won't respond properly, I can't use it for many purposes. The code is quite big, but I can give some information about the code. private void thread() { EventSourceThread = new Thread(new Runnable() { public void run() { while (DataGrabber.getOcr("test", bot)); } }); EventSourceThread.start(); } Thanks in advance! A: I solved the problem. Because I was invoking the thread before sending the whole string to the server, only part of the string was being sent. I fixed the problem by invoking the thread after sending the whole string to the server, and it worked for only half an hour. Q: Stack Overflow Jobs - Untitled "Stack Exchange Jobs" Tag I submitted a job to Stack Overflow Careers and received a reply. As part of this, I was requested to answer 2 questions, which I have done. There is no tag that goes with this post. Should this tag be added? What sort of jobs would it apply
