
OptimUser Crack PC/Windows

Download

OptimUser Crack+ Download [32|64bit]

• OptimUser Free Download is a reliable monitoring program that enables you to keep record of your employee's activity on the computer. The software records the moments of activity, as well as idle periods and creates a report that you can view at any time. The application runs in the background and does not interfere with other processes. • Supervise daily user activity on the computer • OptimUser Free Download is dedicated to employers who wish to monitor their employees' activity on the computer. The software runs in the background and does not interfere with the computer usage, meaning that the user might not even be aware that they are being monitored. • The application is also suitable for parenting control, because it displays which applications were opened and what websites were visited. Moreover, it can create charts according to the type of the activity. Thus, certain websites or programs can be tagged as undesirable, while others can be neutral or desirable. • The software offers a limited list of category names which you can flag as appropriate or inappropriate. For instance, at the work place, games, music or social network websites might be tagged as undesirable, while news and searching engines can be tolerated. • The list of categories cannot be appended or detailed, which means that the website classification is limited to a few categories. Thus, the software can monitor desirable, neutral, undesirable applications/websites, as well as breaks. The daily chart indicates the time recorded for each category. • You can view the hourly report, as well as daily and weekly charts, which indicate the activity for the currently logged on user. The detailed log of opened applications and visited websites. • Monitoring activity by time spent or application used • The details page can be customized to display the application/website records list and sort the entries by status, type, time spent or name. You may use the dedicated searching fields for each table, in order to identify a specific entry. OptimUser Crack is easy to use and can send the statistic data to your computer, so you can remotely monitor other users. • OptimUser Screenshots: Installation: • Plug & Play Installation • Installation & Setup with 1 click • Option to setup the program on the first user login (single startup). • Setup on start-up using a Run

OptimUser With Registration Code Free Download

OptimUser is a reliable monitoring program that enables you to keep record of your employee's activity on the computer. The software records the moments of activity, as well as idle periods and creates a report that you can view at any time. The application runs in the background and does not interfere with other processes. Supervise daily user activity on the computer OptimUser is dedicated to employers who wish to monitor their employees' activity on the computer. The software runs in the background and does not interfere with the computer usage, meaning that the user might not even be aware that they are being monitored. The application is also suitable for parenting control, because it displays which applications were opened and what websites were visited. Moreover, it can create charts according to the type of the activity. Thus, certain websites or programs can be tagged as undesirable, while others can be neutral or desirable. Define activity classification The software offers a limited list of category names which you can flag as appropriate or inappropriate. For instance, at the work place, games, music or social network websites might be tagged as undesirable, while news and searching engines can be tolerated. The list of categories cannot be appended or detailed, which means that the website classification is limited to a few categories. Thus, the software can monitor desirable, neutral, undesirable applications/websites, as well as breaks. The daily chart indicates the time recorded for each category. You can view the hourly report, as well as daily and weekly charts, which indicate the activity for the currently logged on user. The detailed log of opened applications and visited websites. Monitoring activity by time spent or application used The details page can be customized to display the application/website records list and sort the entries by status, type, time spent or name. You may use the dedicated searching fields for each table, in order to identify a specific entry. OptimUser is easy to use and can send the statistic data to your computer, so you can remotely monitor other users. Wow, that is a great program. They should be glad that they started it. Posted 2 years ago Olympic8 Useful software for parents to keep an eye on what their kids are doing on their computer. Posted 2 years ago Gecko Thank you for this! I am a software developer and love these sorts of tools, I was helping a friend move a few things over to this program and it was lacking some things but it is like they never even existed. Thanks for this. Posted 2 years ago chicguy16 Doesn't work with IE11 Posted 2 years ago Jjanen Also the build is old and not compatible with vista 64bit anymore Posted 2 years ago aaronbarda That's really helpful

System Requirements:

Minimum: OS: Windows 7 (64bit) Processor: 1.8GHz Dual Core CPU Memory: 1GB RAM Graphics: Intel HD 4000, OpenGL 2.0, Windows 8 DirectX: Version 11 (Graphics Card: NVIDIA GTX 460/ATI HD 5670) Hard Drive: 50 GB available space Additional Notes: DirectX: DirectX 11 GPU version (i.e. graphics card) Recommended: Processor:
