What's New In SASSCO POS For Restaurant?

Restaurant software such as SASSCO POS for Restaurant allows you to manage the process of ordering, paying and booking in your restaurant. The application allows you to control all aspects of the customer's experience, from the ordering of food or drinks to the actual payment, and has a number of modern features. It includes a menu database, which allows you to create different types of orders that can be sent to the kitchen or displayed for the customers. To make the restaurant's service more personal and offer a quality experience to the customers, you may also use templates to create different menus, based on the type of restaurant. The application supports multiple users, which can log in using separate credentials. The records of each of them will be different, depending on their profile, like the log in date and time. After a regular session has ended, all the changes will be written to the database, which will automatically update the summary screen. Additionally, SASSCO POS for Restaurant offers customers to send the order directly to the kitchen. They may choose to pay using cash, credit card or with a voucher. Moreover, the system allows you to easily track and process the payment details. After the payment is made, you may print the receipt or the payment report, to create individual statistics for every customer. Positioning the application in a specific part of the screen lets you sort customers by type (employees, regular customers, absentee customers) and by the status of their orders (new order, customer's order, order overview). SASSCO POS for Restaurant Application Page: Restaurant software such as SASSCO POS for Restaurant allows you to manage the process of ordering, paying and booking in your restaurant. The application allows you to control all aspects of the customer's experience, from the ordering of food or drinks to the actual payment, and has a number of modern features. It includes a menu database, which allows you to create different types of orders that can be sent to the kitchen or displayed for the customers.
