The player will take control of a small space battle merchant. Your mission is to grow a successful business in this harsh alien environment, carrying countless wares from one planet to the next. While at first, the game appears to be a simple shoot'em up style adventure game, you soon realize that there's much more to this sandbox. Features: Revamped game engine, featuring fully dynamic local physics, interactive objects, 3D cinematics and incredible lighting effects. More than 10 hours of main story, tons of side-quests and bonus content. Local multiplayer mode, bring your friends in for a challenge! Friends Map on Google Play. gameplay of this title, relax with the old fashioned atmosphere of space casinos, look for all the secrets in this entertaining and addictive VR experience! This game is a lot of fun to play as you try to level up by attempting to best your friends and complete challenges. This game is beautifully designed and I believe the ship pieces are very well done. The game play and graphics are really nice and fit the theme and the game interface could use a little bit of tweaking to make things a little easier to use but I think it overall is a decent game. I had high hopes for this game and I was pretty disappointed after I finished it. The game play was fun. You are a space pirate. You are on a massive space ship infested with mechanical monsters. Every level you gain you must kill them all. You do that by doing various maneuvers to fly through them all. Your options are your ship's cannons, thrusters, fire walls and how close you get to a blue enemy ship. You may do the cannon a little differently to gain more points. There is a fog of war that comes up as you go through the various levels. You have to remember the fog of war and that you are limited to how many maneuvers you can do. Not that this was bad. The game was confusing at times. I did have a little bit of trouble knowing what to do in some of the levels but it wasn't very difficult. I was just playing as a beginner. The game was overall fun. I got a little frustrated by how difficult some of the enemies were and the limitations of maneuvering the ship. The enemies get a little more challenging as you go up in difficulty. I like the growing difficulty but I didn't like that you couldn't just choose to battle the harder ones to get all the points. You are forced to fight the enemies. I got in too deep and I couldn't figure out what I needed to do. I also lost a few ship pieces through having difficulty with a level. I would recommend this game if you have a new Oculus or Oculus and Rift combined and are willing to spend some time to learn. This is definitely NOT for the casual gamer. I play a lot of VR games and there's nothing even in the same category as d41b202975
