History The history of AutoCAD Serial Key began with AutoCAD Cracked 2022 Latest Version R14.1, which was developed in 1977 by the Chilton Corporation, now Chilton Software. It was developed for AutoLISP, a LISP dialect. Several hundred programmers at Chilton worked on the application. Work began in December 1976 and was completed by July 1977. Chilton had released a previous version of AutoCAD, AutoCAD R12.1, in 1975. AutoCAD is primarily based on the Chilton software originally developed for AutoCAD R12.1, which was called AutoLISP. The first publicly available version of AutoCAD was AutoCAD R12.1, which was released in 1975. The program used AutoLISP, an application programming language that was used to create objects in the program, to create the drawings that appeared in the program. The program was written entirely by Chilton, a small software development company from Hayward, California. One of the goals of AutoCAD R12.1 was to provide a program that was easy to use. The program was supplied as a 12" × 17" drawing on 8½" × 11" paper in an envelope. AutoCAD was written to be compatible with the National Center for Supercomputing Applications/Minnesota Supercomputer Center (NCSA/MMSC) MULLET (Multi-User Language for User LOcal TeXtures) programming language system. On the marketing side, the company was licensed to Chilton by the Autodesk CAD Corporation, which was incorporated in August 1975 and was a wholly owned subsidiary of the Autodesk CAD Corporation. Chilton Software, Inc. was also incorporated in August 1975. In 1977, the Autodesk CAD Corporation was renamed to Autodesk Inc., and Chilton Software was renamed Chilton Software, Inc. The drawings were sold to various universities as a teaching tool. In the 1980s, Chilton Software acquired the rights to the AutoCAD name from Autodesk CAD Corporation and Autodesk Inc. Between 1979 and 1981, Chilton Software released two minor updates of the AutoCAD program: R15.1 (July 1979) and R16.1 (January 1980). A third minor update was released in 1981, R17.1, but was not named AutoCAD, because Autodesk Inc. wanted to keep the brand separate from the AutoL ca3bfb1094
