The 2009 AutoCAD also included a number of new features, including the ability to create CATIA 3D models and make BIM-related drawings in Revit and other CAD programs. In 2011 Autodesk announced the release of the new add-on application for AutoCAD called ACAT. ACAT was developed for architects to create 3D building and interior layouts and was released to the public on September 20, 2011. ACAT for AutoCAD is supported by the Autodesk Virtual Design Center for Architects and Designers. Version history AutoCAD LT 2009 also included a major update of its command bar, including a new graphically based ribbon. AutoCAD 2010 introduced a new programming language, Visual LISP, allowing developers to program for AutoCAD using the same Visual LISP engine that is also used to develop many other AutoCAD add-ons.
